

**SILVER SPRING TOWNSHIP
SNOW AND ICE REMOVAL POLICY**

During periods of snow and ice conditions, Silver Spring Township's goal is to quickly open and maintain all Township roads for safe and efficient travel. The Township's policy establishes the following priorities:

1. Respond to any bonafide emergency.
2. Insure Emergency Services organization have safe access from their buildings.
3. Clear major Township roads throughout municipality.
4. Clear development roads for one lane passage; provide two lane traffic when possible and practical.

To achieve the above, the Township is divided into four quadrants. A specific driver is assigned to each quadrant. Snow clearing operations begins simultaneously in all quadrants. Drivers who finish their areas will move into other quadrant areas to accelerate the clearing process. The process is repeated as necessary to keep roads passable and safe.

Adopted: September 14, 1994
